Since opening our American BBQ restaurant in the heart of Melbourne CBD more than ten years ago, we've served thousands of happy customers our slow-cooked comfort food.

After so much feedback on our house-made sauces and seasonings, we launched them to the public. Now we're dedicated to making your home-cooked meals just a little bit more fancy.

## CHICKEN SALT MAYO

9369998506934

6 x 230g

**\$7.28**

“Extra chicken salt, please” - a phrase familiar to all Aussies. Well, you asked and we listened - we've added our classic Chicken Salt to our free-range egg yolk mayonnaise to create an umami flavour bomb that will knock your socks off.

## CHILLI MAYO

9369999107536

6 x 230g

**\$7.28**

The creaminess of classic mayo but with a little added spice to put a pep in your step. This Chilli Mayo is the perfect schmear for a working-from-home sanga or to give that potato salad a little dose of fun.

---

## WHY IS EGG YOLK MAYO BETTER THAN WHOLE EGG MAYO?

Egg yolks contain lecithin which emulsifies the oil and water in mayonnaise, while yolks alone provide a richer mayonnaise due to the fat from the yolks. By using only egg yolks, the Fancy Hank's mayonnaise is richer and creamier. Plus, the addition of American Mustard, consumers can expect a tangy hit of umami as well.

# KARMA COLA, NZ

**Karma Cola's** original recipe is made with Fairtrade organic cane sugar and real cola nut grown by the Mende and Temne people of Sierra Leone. Part of the proceeds from each bottle go to cola growers' families.

**Gingerella** is made from ginger—grown organically by Fairtrade farmers in Wayamba, Sri Lanka. Its clean, crisp and fiery kick comes from a unique blend of Fairtrade organic ginger, lemons, sugar and spice and a fair deal for the people who grow them.

**Lemmy** is a combination of organic lemons and Fairtrade organic cane sugar where the farmers get a fair deal for their crop, and a Lemmy zing to you. If life gives you lemons change your luck with a Lemmy Lemonade

**Razza** - Lemons get a sweet tangy twist, a pink lemonade. Fruity, fizzy and fearless, a feel-good flavour from natural raspberry, organic lemons and Fairtrade organic cane sugar

**Organic Orangeade** - Juicy organic valencia oranges sourced from Mexico and lifted by a dash of Fairtrade organic sugar

# BOTANICAL TONICS, GREEN ST KITCHEN, WA

Inspired by traditional ‘Jamu’ which is a medicinal tonic that has its origins deep in the Indonesian tropics. Jamu has been used for centuries for good health and wellbeing. Traditionally jamu is made by cooking the ingredients together hence killing all the good living bacteria in the fresh ingredients. We wild ferment the brew using naturally occurring lactic bacteria’s in the fresh ingredients and natural sugars to create a botanical tonic range that is like no other. Our botanicals are not kombucha, nor are they juice. It is a unique product that has a wealth of health benefits and is here to shake up the beverage category.

### WILD FERMENTED

An all-natural process of lactic bacteria and sugars fermenting in harmony which results in a gut loving tonic full of flavour.

### LOW IN SUGAR

Unlike many drinks on the market that are high in sugar or artificial sweeteners our jamus are all natural and low in sugar.

### ALKALISING ELIXIR

Our jamu range is packed with probiotics to nourish the gut and balance PH levels.

Kimchi has been a staple of the Korean diet for centuries. This spicy fermented cabbage dish comes in many forms and is an essential part of a Korean meal. Larded for assisting in maintaining optimum health, raw fermented kimchi is loaded with vitamins, but its biggest benefit is the “living healthy bacteria” called lactobacilli that is created during the fermentation process. This good bacteria helps to replenish your gut flora which aids with digestion. Not only is our range of kimchi good for you, it also tastes great!

## JANG HOT SAUCE

Jang, in Korean cuisine, is a term that refers to a magical ingredient capable of transforming an ordinary meal into something extraordinary. In this case, we combine fire roasted peppers, Korean chili powder, dark barley malt, and fermented kimchi brine to create a living sauce that is slow-fermented in a wild way. The result is a rich, full-bodied flavor with hints of smoke and mild spice, as well as a sour finish that makes this sauce truly unique.

**WILD FERMENTED**

An all-natural process of lactic bacteria and sugars fermenting in harmony!

**MADE FOR TASTE**

Mildly spiced, low in sugar and packed full of flavour!

**GUT HEALTH**

Our hot sauce is rich with probiotics to help nourish the gut!

# MAESTRI PASTA, ITALY

In Italy there is a strong sense of culture connected to producing and consuming pasta, particularly in the Campania Region and in areas like Gagnano and inland Salerno.

Over the centuries, the art of 'making' pasta has become appreciated at an international level. Today Maestri Pastai still use the best quality durum wheat, bronze extruded as per tradition, in order to ensure that the pasta will have the signature rough and porous surface – which is ideal for sauces.

This also allows Maestri Pastai to maintain their philosophy of safeguarding the ancient traditions whilst paying great care and attention to the quality of the product.

# MORE ABOUT THE PRODUCER

John wanted to become a beekeeper after working for an apiarist one summer back in the 1990s in NZ. He established his first hive in his back yard in 2014. Since then, he and his wife Nic, have been slowly building up hives and postcodes. The goal was to establish at least one beehive in every postcode in WA. That is more than 100 postcodes - and we are currently at around 80.

## Why?

- To make delicious local honey available to everybody
- To increase the number of bees - particularly in the inner-city suburbs
- To improve the local environment by increasing pollination / biodiversity
- The honey is small batch, raw and cold filtered - the bare minimum to ensure you get the purest of WA's honey.
- You know exactly where your food has come from - right down to the postcode.
- Raw honey contains small amounts of pollen from the plants that our bees have visited and many people believe that consuming small amounts of locally produced pollen provides health benefits such as improving or eliminating allergies such as hay fever.

# BRING QUALITY & AUTHENTICITY TO YOUR MEXICAN RANGE.

It all started back in 2010 when Gerardo met Diana & they discovered their shared love for the culture & food of Mexico, real Mexican. Mexico is more than a place, it's thousands of years of rich & flavoursome history, a celebration of tradition, & honest to goodness food shared with friends & familia. At La Tortilleria we're not just passionate about real food & real Mexican, we're driven by it; from the ancient nixtamal process we use to make our tortillas to the local farmers who grow our wholesome ingredients.

Corn tortillas are the heart & soul of real Mexican food, making them is our passion & we do it well. We go back to the roots, to the ancient Nixtamal process developed by indigenous Mexicans as a way of unlocking the nutritional power of their corn. We do it all from scratch, with Aussie grown corn, on site at our tortilleria in Melbourne, Australia. 'Why take the hard road?' you ask, because we care deeply about real food & preserving traditions, & because they simply taste better this way. We hope you will love & share our passion for real Mexican.
